

Statement of National Cooperative Grocers Association  
on Genetically Modified Organisms (GMOs)  
April 26, 2012

National Cooperative Grocers Association (NCGA) values and promotes the production and availability of a safe, accessible, fair, sufficient, and sustainable food system for people of all nations. We support consumers' right to information, including sufficient product labeling, so that they can make informed food choices. Labeling of GE foods is voluntary, which makes it nearly impossible for consumers to avoid GE foods, particularly in packaged or processed foods, should they wish to. NCGA is a funding sponsor and supporter of Just Label It campaign, calling for mandatory labeling of GMO foods.
